From 'About Us': **Welcome to VisualCV!**

Professionals and companies alike have long been frustrated with the inefficiencies of recruiting and career management.

As entrepreneurs, professionals and quite often job candidates ourselves, we simply got tired of dealing with the frustration and inefficiencies of both online and offline recruiting.

The VisualCV reinvents the resume. Ultimately, it will reinvent the way the Internet is used for recruiting, to the benefit of professionals and employers alike.

At the time of checking – Tuesday, February 9, 2010 – the use was free.

Though I have not validated the source or legitimacy, you will find a sample of President Obama's CV on here:
